## Modulus P4PC Pluggable 4-layer PC

The Modulus P4PC is a pluggable multi-layer desktop computer, with secure and evaluated switching between four completely separated computing environments. P4PC takes the Eurotempest MPC design one step further by allowing each computing compartment to be swiftly removed from the workstation after each work session, with zero computational or storage devices left at the workplace. The unplugged devices are small and lightweight, and can easily be locked away in secure storage when the workstation is unattended.

Function	Performance description
CPU	4th generation Intel® Core™ i5-4570R 3.20 GHz
Chipset	Intel® HM87 Chipset
Graphics	Intel® Iris Pro graphics 5200
Networking	2 x 100 Mbit FX/SC (optional 1000 Mbit converters available)
Memory	Dual-Channel, 2 x DDR3L SO-DIMM slots, 1.35 V, 1333/1600 MHz, 16 GB max
Video connectivity	TEMPEST DVI (standard DVI connectors)
Data ports	Optional TEMPEST USB 2.0 or USB 3.0 connectors
Hard drive(s)	256 GB SSD (optional ViaSat Eclipt® core drives available)
Audio	Analog and S/PDIF: Realtek ALC269
Power consumption	ENERGY STAR®: 16 W idle; 88-93 W peak load
Environment	System Environment Operating Temperature: 0°C to +35°C System Storage Temperature: -20°C to +60°C
Dimensions (W/D/H)	400 mm / 382 mm / 145 mm
Weight	ca 11 kg (depending on configuration)
TEMPEST	NATO SDIP 27 Level A certified, Integrated TEMPEST power-line filtering, power cable included.
Limited warranty	3 year standard limited warranty Lifetime warranty on TEMPEST workmanship
